50X1-HUM

1. The following is a description of 4 rocket projectors seen at Gopfritz on 1 August 1947:

(a) The barrel is approximately 2.5 meters long with a screw cap and ring at the mouth of the muzzle. The cap and ring serve as a coupling for towing.

(b) The caliber is estimated at 180 mm.

(c) This projector has two wheels with pneumatic tires which are secured to the lower portion of the barrel by means of metal fastenings resting on springs

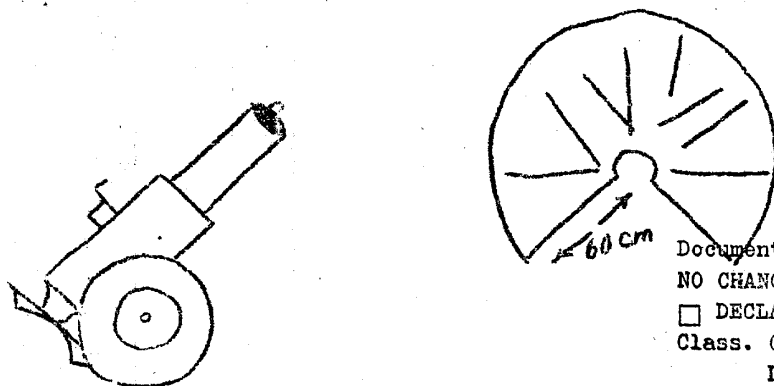

50X1-HUM

(d) On the left side of the metal fastenings are 2 wheels which are for the laying of the projector (sic).

(e) The base plate, which is estimated to be between 1.2 and 1.5 meters in diameter, is secured to the projector.

(f) The ammunition boxes are about 70 cm X 25 cm X 25 cm.

2. Sketch of the rocket projector and base plate
